Our Mission

To establish biocompostable products as viable and sought out solutions to replace the environmentally unsound and unsustainable alternatives derived from plastics

BioViron™
www.bioviron.com

ACHIEVING OUR MISSION

- ❑ By being a leading voice in the education of governments, industry, and the public as to the real alternatives available through sustainable and biocompostable products.
 - ❑ By building a state of the art manufacturing plant and demonstration unit.
 - ❑ By protecting IP on our product range and through the growth of a profitable and sought after business.
-
